Income Tax - S Corporations

I paid tax to several other states through an S corporation, both as part of a composite return in some states and through an S Corporation tax in other states. Can I claim the credit for taxes paid to another state for any of these taxes paid?

Yes, the credit is available for income taxes paid on your behalf by an S Corporation. The credit must be computed separately for each state and can only be claimed for income taxes paid. Taxes such as Michigan's single business tax do not qualify for this credit because they are not considered income taxes. Since copies of each state's composite or corporate returns are generally not available to shareholders, you should attach a copy of the statement of taxes provided to you by the S Corporation.
